GAMMASOFT JEANS

Liquid softener for all kind of fibres, especially raccomandanded for treatment of cotton clothes with indigo dyes; it avoids yellowing of denim when exposed at the sun.

Not raccomandanded for elastic jeans with lycra fibres.

Properties :

Clothes become softner and smother. It protects clothes dyed with indigo from degradation by the combination with radicals present in the air such as ozone and nitrogen oxide.

It can be used in short or long bath. No negative influence on fastness dyes and does not alter the color. It also resists the drying at high temperature (up to 140°C .), without yellowing whites . Practically it does not foam and is therefore easily dosable .

On garments treated with optical brighteners , it can influence the degree of white.

Physical and chemical characteristics:	product based on fatty acid condensates
Appearance:	dispersion ivory
Ionic charge:	cationic
pH:	6-7
Compatibility:	compatible with cationic and non-ionogenic. The usage together with other softeners can affect the effect of Gammasoft Jeans To be avoided the simultaneous use of silicone products

Storage: Six months in original packaging

Dosage and use: 3-6 g / l of Gammasoft jeans to be added in the last rinse, keeping the pH 6-7, at 25-40 ° C.
After 2-3 ' add 1-2 g / l of sodium bicarbonate for bringing pH to 7.5-8.5. Treat for 10 ' .
Centrifuge without rinse; after, dry.
