NETZER JET

Mixture of non ionic and non foaming surfactants

Ionic charge: non ionic

Incompatible materials: none

Product properties: wetting/detergent agent-non- foaming

NETZER JET is used as a detergent-wetting agent in all processes in which it is not desired the presence of foam.

NETZER JET for its particular formulation does not cause the formation of foam above 60 ° C even in machines with high turbulence.

NETZER JET is used in the scouring of cotton knit, nylon and PES and in all processes where it is necessary to have a perfect wettability.

USE/DOSES

The amount of use recommended, during the step of scouring, as a detergent is 2-4 g / l.

The amount of use recommended, as wetting agent-detergent, is 1-3 g / l.

PREPARATION

Solubilize NETZER JET with cold water and introduce in the working cycle.

The information contained in this circular are given according to our best knowledge and experience, however, given the multiplicity of systems of work and applications we can not assume guarantees for the individual case
